

Tecala is leading the way. With our **Climate Active** **Carbon Neutral** Certification.

Tecala is the only mid-market Managed Service Provider (MSP) to have Climate Active Carbon Neutral Certification.

We're certified for [Business Operations](#), having achieved a state of carbon neutrality by reducing the emissions we put in the atmosphere where possible, and accounting for the remaining by assisting projects that remove emissions.

By delivering transformational technology outcomes from a carbon neutral environment, we're sending a clear message to our clients and partners that we're serious about reducing the impact our business is having on the environment.

So, if you're also looking to meet standards of carbon neutrality, we'd love to join forces with you.

Partnering with local and global initiatives, **we're reducing carbon**

To help achieve our carbon-neutral status, we're supporting two highly credible and meaningful projects that are sequestering carbon from the atmosphere.

What this means to you

By being certified, we give you the assurance that we're serious about addressing climate change. And we're 100% committed to sustainability, innovation, and industry leadership in this area.

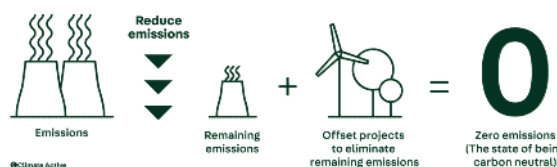

Partnering with Tecala gives you the assurance that you're working with a team that has a clear sustainability goal, and can build sustainability into your strategic technology roadmap.

We use certified IT hosting locations for our servers. Our NextDC locations are 100% green powered and climate active certified; our Equinix facilities are 95% renewable across their global portfolio.

What is Climate Active?

Climate Active is an ongoing partnership between the Australian Government and Australian businesses to drive voluntary climate action. It enables organisations to work together to meet standards of carbon neutrality, reduce our greenhouse gas emissions, and transition to a low-carbon economy.

What does it mean to be carbon neutral.

Regenerating 30,000ha of bushland in NSW's Sturt Desert
